
TPL Reporting

MATERNITY CARE PROGRAM

The Maternity Care Program requires that all TPL collected on behalf of Medicaid deliveries be reported through the Maternity Care Program. Contractors are required to submit TPL collections up to the contracted amount for subcontractors. If the TPL amount collected is greater than the contract amount, there must be a system in place to identify collections over and above this amount. For example, the Primary Contractor has subcontracted with the hospital for \$2000 per delivery and the physician has contracted for \$1000. A recipient delivers and the TPL amount that the hospital receives is \$2500 and the physician receiver \$1200. This amounts to TPL revenue in the amount of \$700 over the negotiated rate. The Primary Contractor reports TPL in the amount of \$3000 on the global submitted to Medicaid and this amount is subtracted for the payment to the contractor. Contractors are required to report the additional TPL amounts to third party quarterly. Report format is as follows:

Contractor Provider Number	Contractor Name	District Number	Quarter Ending	Total Recipients with TPL Payments for Quarter	Total TPL Amount Collected	Total Amount TPL Reported on Maternity Claim	Difference in Reported and Collected Amounts

CONTRACTOR NAME_____

Contractor _____
Provider Number _____
District Number _____
Quarter Ending _____

Reports are due 45 days after quarter end. For example, adjudication dates 10-1 through 12-31, the report is due 2-15. Reports may be submitted with other required reports.
